PROJECT

- **CloudKMap** (<https://github.com/lolapriego/CloudKMap>): Course project. A Cloud based task scheduler that supports MapReduce applications using Amazon Web Services.
- **Deadline Master** (www.deadlinemaster.appspot.com): A web application that uses colored timelines to help managing due dates.
- **Kasa Game** (www.kasa-game.appspot.com): An UNO-like card game. Built up a web app version on MonkeyBars Hackathon.
- **Social Network Measurer**: Course project. A Facebook app that scores one's network using naive benchmark.
- **Compressed Domain Based Motion Detection**: Graduation project. A desktop application that detects moving objects in compressed video.
